DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-17 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1-21 of copending Application No. 10062263. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Drawings

3. The drawings are objected to because all boxes in Fig. 9 should be labeled with their appropriate function. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities:

The word "son" should be replaced with the word "so" on page 2, line 4.

Appropriate correction is required.

5. The abstract of the disclosure is objected to because extraneous figure label "Fig. 3" occurs on line 15. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. In reference to claim 16, the use of the word "comprising" twice, fails to clearly define the metes and bounds of the claimed "mobile telecommunication system". It is unclear if the 2nd appearance of the word "comprising" further defines the "mobile telecommunication system" or the "circular buffer".

In reference to claim 17, although the technique of short hand claim drafting is permissible, in this situation, the type of claim drafting gives rise to a no antecedent basis problem. For example, a first (second, third, or fourth) memory is used to define both circular buffer of claim 11 and either the "mobile communication system" or "circular buffer" of claim 16.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to implementation of circular buffers:

U.S. Pat. No. 4,888,739 to Frederick et al.
